

Bachelor of Physiotherapy (BPT) :

About Physiotherapy:

- Physiotherapists are health care professionals with a significant role in health promotion and treatment of injury and diseases. They combine their in-depth knowledge of the body and how it works with specialized hands-on clinical skills to assess, diagnose and treat symptoms of illness, injury or disability.
- Physiotherapy is defined as the system of medicine that includes examination, diagnosis, treatment, advice, and instruction to any person preparatory in connection with movement dysfunction, bodily malfunction, physical disorder, disability, healing & pain from trauma & disease, physical & mental conditions using physical agents including exercise, mobilization, manipulation, mechanical and electrotherapy devices.”
- Physiotherapy has evolved as an important component of modern health care. It focuses on restoring movement, helping people maintain and maximize their physical strength, function, and overall well-being by improving their activities of daily living.

Scope of Physiotherapy:

- Physiotherapy is an essential part of the health and community/welfare services delivery system.
- Physiotherapists practice independently of other health care/service providers and also within multidisciplinary rehabilitation programmes to prevent, gain, maintain or restore optimal function and quality of life in individuals with loss and disorders of movement.
- Physiotherapists are guided by their own code of ethical principles. Thus, they may be concerned with any of the following purposes:
- Promoting the health and well-being of individuals and the general public/society, emphasizing the importance of physical activity and exercise.
- Preventing impairments, activity limitations, participatory restrictions and disabilities in individuals at risk of altered movement behaviours due to health or medically related factors, socio-economic stressors, environmental factors and lifestyle factors.
